

To whom it may concerns

Subject: Reference letter to support Francesco Bosso.

Dear Madam or Sir,

I am professor at Politecnico di Milano and Chair of the Master in Geoinformatics Engineering. My research and teaching activities include GNSS algorithms and indoor positioning.

Francesco Bosso was a my former student of the course of "Positioning and Location Based Services" that I teach for the Master in Geoinformatics Engineering at Politecnico di Milano. He always actively participated to all the class activities and sustained an excellent final exam, with a mark in the upper 5%.

As Chair of the MSc, I know and state that Francesco has in general excellent marks in all our exams, both in geospatial information and in Computer Science; moreover, he always participates really enthusiastically to all the extracurricular technical and scientific activities we are organizing.

For the above reasons, I strongly recommend Francesco Bosso for a Master thesis and / or internships.

Yours Truly
Prof. Ludovico Biagi
